**TestNG for Eclipse**

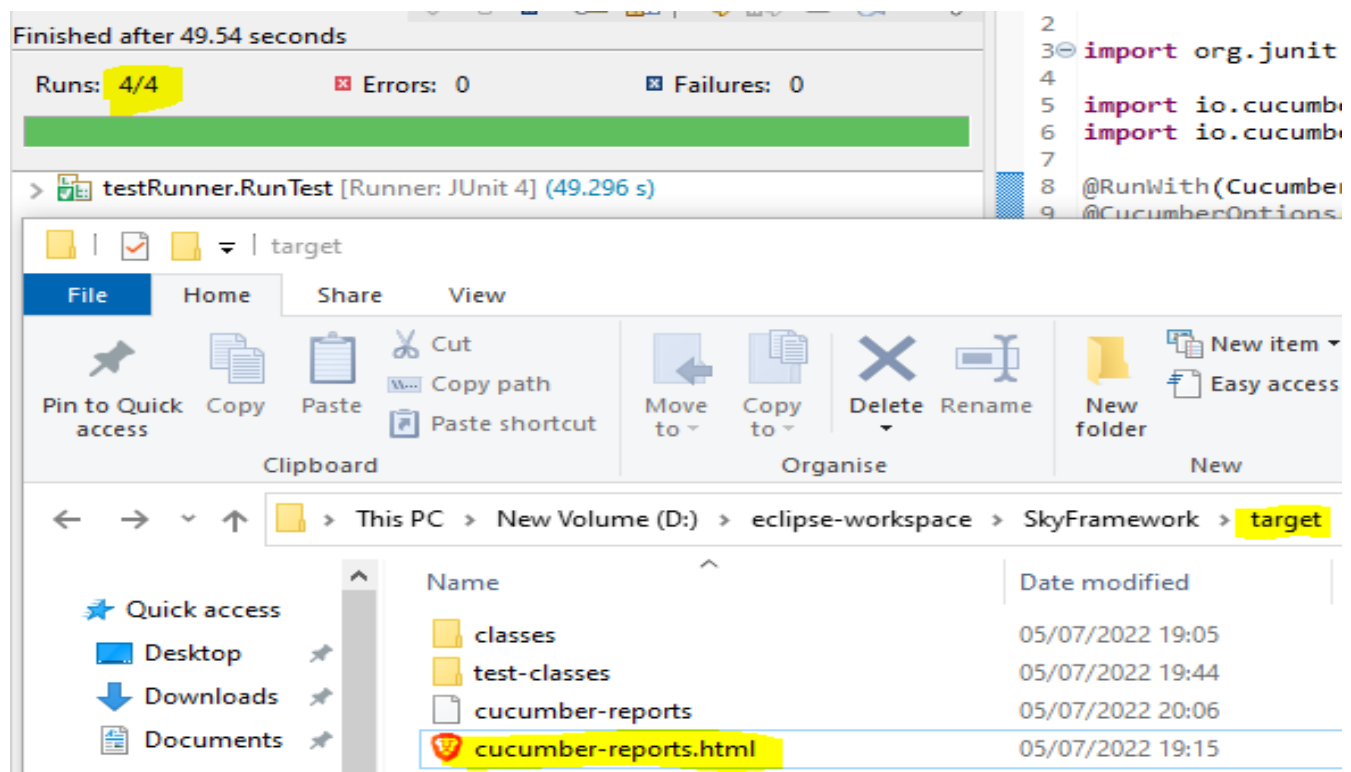

This plug-in lets you run your TestNG tests from Eclipse
lets you... [more info](#)

- Navigate to the testRunner folder and open the RunTest class as seen below

- Select the arrow at the top of the pane next to the green play button and select RunTest with JUnit

- Once the test has finished running - navigate to the target folder within the framework and change the report to HTML to view.

- The report should look like this

✓ file:///D:/eclipse-workspace/SkyFramework/src/test/java/Features/sky.feature

@TestScenario

Feature: This feature will make sure that the shop page is navigable and usable

@Test1

Scenario Outline: User navigates to shop page

- ✓ **Given** I am on the home page
- ✓ **When** I navigate to <page>
- ✓ **Then** the user should be on <page>

Examples:

✓	page
✓	deals

@Test1

Scenario: User Sees Instructions on the Sign In Page

- ✓ **Given** I am on the home page
- ✓ **When** I try to sign in with invalid credentials
- ✓ **Then** I should see a box with the text Create your My Sky password

@Test1

Scenario: User sees a list of deals on the deals page

- ✓ **Given** I am on the deals page
- ✓ **Then** I see a list of deals with a price to it

@Test1

Scenario: User uses the search box

- ✓ **Given** I am on the home page
- ✓ **When** I search Sky in the search bar
- ✓ **Then** I should see the editorial section
