Sky Tech Test - Framework Guide

Ryan Jeavons 07584427041 ryanjeavo@gmail.com 05/07/2022

- Please download and ensure **Eclipse IDE** is installed
- Please ensure Google Chrome is downloaded and installed
- Download the Framework from the GitHub repo
- Right Click Sky Framework in Project Explorer and select Properties
- Ensure that the Compiler Compliance Level is 1.7 and not 1.5
- Select Apply and Close

- Check that the GBP values are correct (They may download as an unknown symbol and need to be changed)
- Thi applies to both the Asserts within Deals.Java and DealsPage.Java classes

```
73
            //Asserts deals are as expected
            String expOffer1Value = "f26";
75
            boolean checkOffer1 = deals.returnOf
76
            Assert.assertEquals(true, checkOffer
77
78
            String expOffer2Value = "f46";
79
            boolean checkOffer2 = deals.returnOf
80
            Assert.assertEquals(true, checkOffer
81
82
            String expOffer3Value = "£38";
83
            boolean checkOffer3 = deals.returnOf
84
            Assert.assertEquals(true, checkOffer
85
```

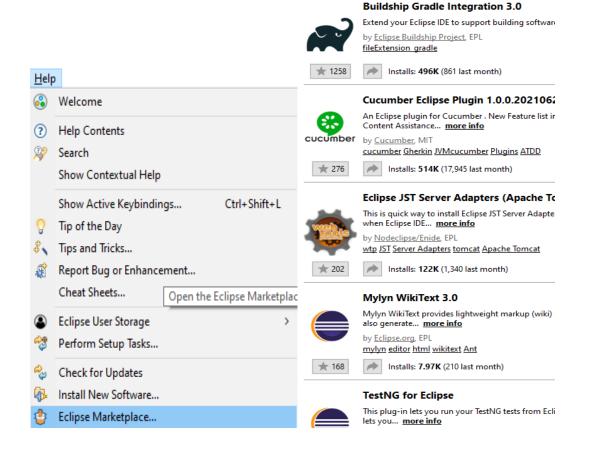

```
//Element declarations
By skyQButton = By.xpath("//span[contains(.,'Sky Q')]");

By offer1Name = By.xpath("//p[contains(.,'Sky Q, Sky TV & Netflix')]");
By offer1Value = By.xpath("//span[contains(.,'£26')]");

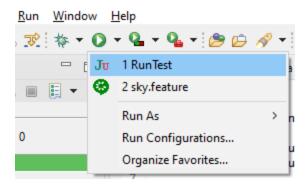

By offer2Name = By.xpath("//p[contains(.,'Sky Q, Sky TV, Netflix & Sky Sports')]");
By offer2Value = By.xpath("//span[contains(.,'£46')]");

By offer3Name = By.xpath("//p[contains(.,'Sky Q, Sky TV, Netflix & Cinema')]");
By offer3Value = By.xpath("//span[contains(.,'f38')]");
```

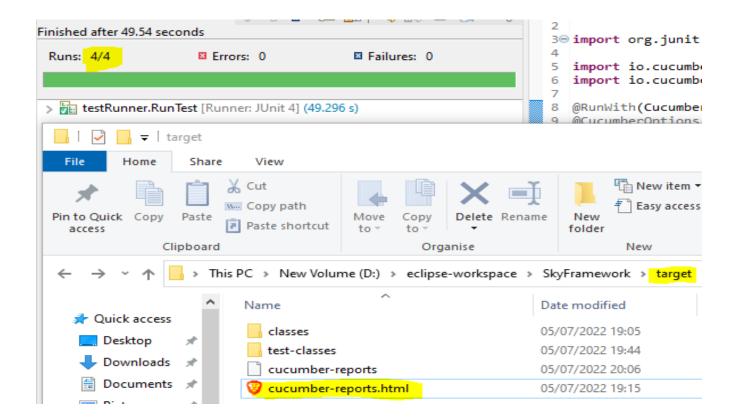

- Select Help from the top-nav and select Eclipse Marketplace
- Download all of the plug-ins from the right hand image

 Select the arrow at the top of the pane next to the green play button and select <u>RunTest</u> with

Once the test has finished running - navigate to the target folder
 within the framework and change the report to HTML to view.

- The report should look like the below image

@TestScenario

Feature: This feature will make sure that the shop page is navigable and usable

@Test1

Scenario Outline: User navigates to shop page

- Given I am on the home page
- When I navigate to <page>
- Then the user should be on <page>

Examples:

@Test1

Scenario: User Sees Instructions on the Sign In Page

- Given I am on the home page
- When I try to sign in with invalid credentials
- Then I should see a box with the text Create your My Sky password

@Test1

Scenario: User sees a list of deals on the deals page

- Given I am on the deals page
- Then I see a list of deals with a price to it

@Test1

Scenario: User uses the search box

- Given I am on the home page
- When I search Sky in the search bar
- Then I should see the editorial section
